

IEP Online™ Special Education Management Systems

IEP Online empowers educators by helping them to develop and manage IEP and IPRC processes more effectively to better serve every student.

IEP Online is a comprehensive special education management solution that will help your school board create and manage content-rich, individualized education plans (IEPs) quickly while meeting all Ontario Ministry of Education (MoE) requirements and reporting needs. Public Consulting Group (PCG) is the largest provider of IEP solutions in North America, providing schools with IEP software for nearly 20 years.

Features and Benefits

IEP Online is a special education management solution that enables educators to create content-rich IEPs in an intuitive manner. IEP Online is compliant with all Ontario MoE guidelines. Features include:

Documentation

All of our IEP Online modules provide a comprehensive process to document a student's progress, from the initial Identification, Placement, and Review Committee (IPRC) process to the creation of a complete IEP and regular updates to alternative report cards, transition plans, learning expectations, consultation logs, Special Equipment Amount (SEA) equipment, special transportation, and more.

Framework

By providing an MoE-compliant framework, IEP Online allows teachers to focus more time on developing educational programs for their students rather than the administrative process. Convenient on-screen indicators note which specific steps are left to complete for each IEP and IPRC document at all times.

Decision-Making

IEP Online helps teachers to better define the decisions they are making about their students. Meaningful data drives education planning and informed decisions.

Compliance

IEP Online follows MoE guidelines and produces Ministry-compliant forms in PDF format. IEP Online also supports Ontario School Information System (OnSIS) reporting.

Comprehensive

Additionally, IEP Online offers an integrated module, **Equipment Online**, to help with SEA and other specialized equipment assignments and tracking. It also offers **Clinical Services**, a workflow management module for school-based clinical services that includes referrals, consent forms, service tracking, and more.

PCG's Proven Approach to Special Education Management

Accessibility

Our modern interface includes user-friendly, web-based graphics, icons, and tools. It is designed for use on an electronic tablet as well as a laptop and desktop computer. IEP Online is fully compatible with most web browsers as well. In addition, the system is 100 percent process-driven to make the creation of IEP and IPRC forms convenient and intuitive for educators, eliminating the time-consuming need to review multiple manual forms. Integrated email notifications also simplify the planning of school team meetings and other special education events.

Quick Implementation

Our quick implementation process will have your system up and running within weeks. IEP Online supports hosted and self-hosted installations as well as active directory integration. The system can be integrated with your existing student information system (SIS) to eliminate redundant data entry, saving staff valuable time and effort.

User Support Groups

IEP Online continuously evolves to stay on the leading edge of current educational trends. We hold regularly-scheduled customer meetings and welcome your thoughts and ideas to enhance the system and modules.

Full Product Offerings

IEP Online offers a comprehensive and integrated special education management solution, including:

- ✓ Modules for reporting (Flexible Reporting)
- ✓ Equipment tracking (Equipment Online)
- ✓ School board administration (Admin Online)
- ✓ Clinical services management (Clinical Services)
- ✓ Specialized transportation management (Transportation Online)

All modules are accessed through our web-based dashboard and do not require special plug-ins or add-ons.

Training and support

We offer a variety of training options that cover all IEP Online functions and capabilities.

About PCG

We are the largest provider of IEP solutions in North America. Since 1986, PCG has offered consulting and technology systems to help schools, districts, and state education agencies/ministries of education improve programs and processes, optimize resources, and promote student success.

In Canada, PCG offers solutions, services, and expertise in many areas, including:

- Special Education (IEP, IPRC, SEA)
- Strategic Planning
- Data Analytics/Data Warehousing
